Our idea

During the holidays, families should spend
time together. Why not learn German
together with other families who are in the
same situation? In our special family
courses, parents, teenagers and younger
children can learn not only to communi-
cate effectively and confidently in German,
but also learn about their new country, Ger-
many, and the people and lifestyle here.
There is also the chance to network with
other families in the same situation, ex-
change experiences and share learning
opportunities with other parents and
children.

Course content

Using a blend of clear, structured lessons
and interactive exercises and role plays, we
will not only teach you German vocabulary,
grammar and key phrases but make sure
you are confident to use them.

Target group

Expat family members 8 years and older.
You can either register as an individual or
take advantage of the interesting family ra-
te: If you are 2, 3 or more members of 1 fa-
mily then you pay the family price!
